

SP 110-B

Beadless Welding Technology

- Smooth Inner Bore
- Smallest Weld Area Required
- Built on Proven SP Pressure Control Technology
- Quickest Weld Times in the Market

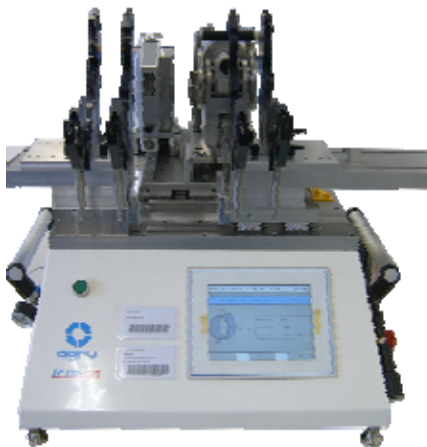

Features

Integral air compressor with hose reel stored inside the machine. Automated fusion process using touch screen display with walk through instructions. Automatic cooling process once weld is complete. Automated clamping device secures the pipe to the correct tightness.

Designed for pharmaceutical applications, the SP 110-B provides unbeatable performance.

Specifications

Available Materials PVDF, PP, PPn, E-CTFE
Size Range 20-110mm (1/2"-4")

Balloon Design

Designed for maximum usability and perfect alignment every time. Silicon coated balloon slides easily in and out of all thermoplastic materials; no need to use a stainless steel pusher bar. Internal line makes centering easy.
