

## PP-Pure™ High Purity Piping System

The PP-Pure™ piping system is constructed of pigmented polypropylene, manufactured to stringent high purity standards and double bagged. PP-Pure™ offers a cost savings and larger size range over traditional high purity materials.

### Product Benefits

- Available up to 12" (315mm) for large diameter installation projects
- Save 5-10% on traditional material costs
- Complete range of fittings and valves in stock
- Compatible with our Purad™ UHP PVDF and PolyPure™ PP-natural piping systems

### Specifications

**Material:** Polypropylene (grey)

**Size Range:** ½" - 12" (20 - 315 mm)

**Connections:** IR / Butt

**Pressure Rating:** 150 psi SDR 11

**Packaging:** Double Bagged

### A Quality Solution at the Right Price

Whether you are looking to reduce costs on DI return lines or save big with an entire system, PP-Pure™ is an excellent choice for your next high purity water system.

The high purity production ensures systems will startup quickly and produce clean water quality.

**Purad™ • PolyPure™ • PP-Pure™**
